1 Introduction

The Gemini IT system underpins the commercial Gas Transmission regime and accounts for all capacity and energy transactions. It is owned by National Grid (NG) with technical support provided by Correla under the Data Services Contract.

UNC0745S Mandatory Setting of Auction Bid Parameters (MOD745) seeks to mandate that Users set certain bid parameters, before placing bids in short term entry or exit auctions on the Gemini systems. All auctions with a daily capacity product are in scope, including both firm and interruptible/off-peak. Interconnection Point auctions are excluded, as the bid parameters would be required to be input into Gemini only, and not PRISMA.

Users occasionally place bids that have some form of error within them in terms of the volume or Price. Mandating the setting of 'Price' and 'volume parameters ($\text{Value} = \text{Volume} \times \text{Price}$), will remove the chances of the higher order of magnitude mistakes being made. This will help prevent Users from placing bids containing errors. It will also protect the wider industry from the effort, complexity and confusion that may arise should bids placed in error be successfully disputed.

An additional rule shall be added into the relevant auction rules section(s) in the UNC Transportation Principal Document (TPD). The Gemini system will be changed so that the setting of the 'Price' and 'Volume' bid parameters by Users shall become mandatory prior to auction participation.

National Grid have an obligation to customers and Ofgem to maintain compliance with the Uniform Network Code (UNC) and ensure that Gemini meets the needs of its users.

This document is the External Screens Pack which describes modified screen functionality being delivered as part of the UNC0745S Mandatory Setting of Auction Bid Parameters.

2 Setup Shipper preferences

2.1 Overview

The Gemini System facilitates the System User to 'Add', 'Modify', 'View' and 'Audit' the specified Bid Validations Limits.

On invoking the screen, BA code, abbreviated name and full name of the logged in System User will be displayed. 'Query', 'Add' and 'Modify' buttons will be enabled.

Following are the changes as part of UNC0745S Mandatory Setting of Auction Bid Parameters:

The Gemini System will provide a facility to the existing Add and Modify Preferences screens as follows:

- ✓ The 'Lower Limit' and 'None' validation rules is removed from the 'Validation on' field available in Add and Modify functionalities
- ✓ The 'Lower Limit' and 'None' validation rules is not to be populated for the 'Capacity' and 'Price' parameters for below MOS type:
 - a) WDDSEC
 - b) DADSEC
 - c) DISEC

- System: **Gemini**
- Screen Path: **Home > Deal > Capture > Set Up Shipper Preferences**

2.2 Add/ Modify Preferences Screen

The figures below displays the modifications to the existing screen:

The screenshot shows the 'Add Preferences' screen in the Gemini system. The interface includes a navigation bar with 'Product', 'Trade', 'Deal', 'Constraints', 'Meter Details', 'Nominations', 'OCM', 'Measurements', and 'Allocations'. Below this, there are fields for 'Messages-27', 'User Name: XBUS1001', 'BA: BUS', and 'User Role: IGMS019'. The main content area is titled 'Add Preferences' and contains several input fields: 'Product*' (ENTRY CAPACITY FIRM PRIMARY), 'Location*' (AVONMOUTH LNG, BACTON, BARROW), 'BA: BUS', 'Abbreviated BA Name: BG TRADING', 'BA Name: BRITISH GAS TRADING ..', 'MOS*' (RMTTSEC, TISEC, UMSEC, WDDSEC), and 'Validation Parameter*' (CAPACITY). There are also 'Upper Limit*', 'Lower Limit*', and 'Units: kWh' fields. A red box highlights the 'Validation On*' dropdown menu, which is currently set to 'UPPER LIMIT'. A blue callout box with the number '1' points to this dropdown menu.

The table below describes the modifications that will be made to this screen:

1	Users can view 2 options on 'Validation On' tab as UPPER LIMIT and BOTH up on selecting MOS name as WDDSEC and Validation parameters PRICE/CAPACITY in Add/Modify preferences Screen
2	Users can view 2 options on 'Validation On' tab as UPPER LIMIT and BOTH up on selecting MOS name as DADSEC and Validation parameters PRICE/CAPACITY in Add/Modify preferences Screen
3	Users can view 2 options on 'Validation On' tab as UPPER LIMIT and BOTH up on selecting MOS name as DISEC and Validation parameters PRICE/CAPACITY in Add/Modify preferences Screen

3 Setup User Preferences

3.1 Overview

The Gemini system facilitates System User to 'Query', 'Add - new requests', 'Modify' and 'Withdraw' existing requests during the Application/Request Window.

On invoking the Capture Request screen from the Deal Management module, the BA code, BA abbreviated name and BA name of the logged in System User will be displayed. The System User logged into the system can place requests only for themselves.

Following are the changes as part of UNC0745S Mandatory Setting of Auction Bid Parameters:

The Gemini System will provide a facility to the existing Add and Modify Preferences screens as follows:

- ✓ The 'Lower Limit' validation rule is removed from the 'Validation on' field available in Add and Modify functionalities
- ✓ The 'Lower Limit' validation rule is not to be populated for the 'Capacity' and 'Price' parameters for below MOS type:
 - a) WDDNEX
 - b) DADNEX
 - c) DONEX

- System: **Exit**
- Screen Path: **Home > Deal > Capture > Set Up User Preferences**

3.2 Add/ Modify Preferences Screen

The figures below displays the modifications to the existing screen:

The screenshot shows the 'Gemini Exit' 'Add Preferences' screen. The top navigation bar includes 'Contract', 'Product', 'Publish', 'Deal', and 'Constraints'. The user is logged in as 'XBUS1001' with a role of 'EXIT007'. The environment is 'TC4'. The breadcrumb trail is 'Home > Deal > Capture > Add Preferences > Query'. The main form area contains the following fields:

- Product*: NTS EXIT FLAT CAPACITY FIRM PRIMARY
- Location*: AIRPRODUCTSIND (dropdown menu open showing ALDBROUGHSTOR and ALREWASEMOT)
- BA Code: BUS
- BA Abbr. Name: BG TRADING
- BA Name: BRITISH GAS TRADING LIMITED
- MoS*: DADNEX (dropdown menu open showing WDDNEX)
- Validation Parameter*: CAPACITY (dropdown menu open showing VALUE)
- Upper Limit: [text input]
- Lower Limit: [text input]
- Units: Wh
- Validation On*: [dropdown menu open showing --Select--, Upper Limit, Both]

A red box highlights the 'Query' and 'Clear' buttons. A blue callout bubble with the number '2' points to the 'Query' button. At the bottom, there is a 'NOTE: Please select the field "Validation On" to provide values for "Upper Limit" and/or "Lower Limit".' and 'Save', 'Clear', and 'Cancel' buttons.

The screenshot shows the 'Gemini Exit' 'Add Preferences' screen, similar to the first one but with different values. The breadcrumb trail is 'Home > Deal > Capture > Add Preferences > Query'. The main form area contains the following fields:

- Product*: NTS EXIT FLAT CAPACITY OFF-PEAK PRIMARY
- Location*: AIRPRODUCTSIND (dropdown menu open showing ALDBROUGHSTOR and ALREWASEMOT)
- BA Code: BUS
- BA Abbr. Name: BG TRADING
- BA Name: BRITISH GAS TRADING LIMITED
- MoS*: DONEX
- Validation Parameter*: CAPACITY (dropdown menu open showing VALUE)
- Upper Limit: [text input]
- Lower Limit: [text input]
- Units: kWh
- Validation On*: [dropdown menu open showing --Select--, Upper Limit, Both]

A red box highlights the 'Query' and 'Clear' buttons. A blue callout bubble with the number '3' points to the 'Query' button. At the bottom, there is a 'NOTE: Please select the field "Validation On" to provide values for "Upper Limit" and/or "Lower Limit".' and 'Save', 'Clear', and 'Cancel' buttons.

4 Create Bids

4.1 Overview

The Gemini system allows the System User to place bids for a Setup Method of Sale for a Product, a specific location and sub transaction period(s) when the bid window is open.

The Gemini system facilitates the System User to 'Add' new bids, 'Query', 'Modify' and 'Withdraw' existing bids during the bid window.

Following are the changes as part of the UNC0745S Mandatory Setting of Auction Bid Parameters change:

The Gemini system will provide a facility to the existing Capture Request screen as follows:

- ✓ New validation to mandate the setting of the 'Price' and 'Capacity' bid parameters at Entry by shippers prior to auction participation
- ✓ New Error message is introduced in the capture request to restrict shippers placing bids without shipper preferences
- ✓ The Gemini system validates shippers preferences for the below MOS type
 - a) DADSEC
 - b) WDDSEC
 - c) DISEC

- System: **Gemini Entry**
- Screen Path: **Home > Deal > Capture > Create Bids > Add Bids**
Home > Deal > Capture > Setup Shipper Preferences

3.2 Add Bids Screen

To set Price and Capacity validation go to Home > Deal > Capture > Setup User Preferences”</p>
---	---

5 Capture Requests

5.1 Overview

The Gemini System allows System User to set up their own parameters at each NTS Exit Point and these parameters will be validated by the system during any request placement.

There are no restrictions on when System User can set the preferences in the system. The system will consider those parameters available in the system during capturing requests to validate the requests placed by the System User.

Following are the changes as part of the UNC0745S Mandatory Setting of Auction Bid Parameters change:

The Gemini system will provide a facility to the existing Capture Request screen displays as follows:

- ✓ New validation to mandate the setting of the 'Price' and 'Capacity' bid parameters at Exit by shippers prior to auction participation
- ✓ New Error message is introduced in the capture request to restrict shippers placing bids without shipper preferences
- ✓ The Gemini system validates Users preferences for the below MOS type
 - a) DADNEX
 - b) WDDNEX
 - c) DONEX
- System: **Gemini Exit**
- Screen Path: **Home > Deal > Capture > Capture Request > Add Request**
Home > Deal > Capture > Setup User Preferences

5.2 Add Request Screen

The figures below displays the modifications to the existing screen:

The screenshot displays the Gemini Exit application interface. At the top, there is a navigation bar with the Gemini Exit logo and the National Grid logo. Below the navigation bar, there are tabs for Contract, Product, Publish, Deal, and Constraints. The main content area is titled "User Preferences" and contains several dropdown menus and text fields. The "Product*" dropdown is set to "NTS EXIT FLAT CAPACITY FIRM PRIMARY". The "Location*" dropdown is set to "ALREWASWIMOT". The "BA Code:" field is "XXX", "BA Abbr. Name:" is "XXX", and "BA Name:" is "XXX". The "MoS*" dropdown is set to "DADNEX" and "WDONEX". The "Validation Parameter*" dropdown is set to "CAPACITY" and "VALUE". There are "Query" and "Clear" buttons at the bottom right of the form. Below the form, there is a message "No Data Found For Your Query Criteria". At the bottom right of the page, there is an "Add" button.
