## A2: Impacted Parties

Customer Class(es):	<input checked="" type="checkbox"/> Shipper	<input checked="" type="checkbox"/> Distribution Network Operator
	<input type="checkbox"/> NG Transmission	<input checked="" type="checkbox"/> IGT
	<input type="checkbox"/> All	<input type="checkbox"/> Other <Please provide details here>
Justification for Customer Class(es) selection	DSC parties have highlighted that they have specific use cases for access to data in order to fulfil necessary obligations.	

## A3: Proposer Requirements / Final (redlined) Change

Problem Statement:	Currently parties do not have a streamlined view of specific data sets in order to resolve use cases.
--------------------	---

Change Description:	<p>DSC parties have indicated that they consider that they have specific use cases for access to data for them to fulfil activities necessary for them under UNC and Licence. They have indicated that they expect that they have specific data requirements based on particular use cases and would like to specify the necessary data that their users will wish to access rather than necessarily progressing through a series of screens to access a standard set of data.</p> <p>They anticipate that this service would be discrete from the Data Enquiry Service.</p> <p>It is expected that this will need to provide a User Interface – and based upon prescribed search criteria (that will need to be defined for each use case) will return a specified set of data items (which again will be specified per use case).</p> <p>This needs to be a low cost solution option that allows access to data for designated individuals within DSC parties organisations. This service would be available to core DSC customers. [This may be extended to Service Providers – such as the DMSP at some point in the future].</p> <p>It is expected that users will need to access this data via a user interface (screen) and it is not expected that this will be a machine to machine API.</p>

#### A4: Benefits and Justification

Benefit Description:	<p>Parties will be able to streamline processes and have more efficient access to datasets to resolve queries in given scenarios.</p> <p><i>What, if any, are the tangible benefits of introducing this change? What, if any, are the intangible benefits of introducing this change?</i></p>	
Benefit Realisation:	<p>Upon delivery, on a use case basis.</p> <p><i>When are the benefits of the change likely to be realised?</i></p>	
Benefit Dependencies:	<p>None</p> <p><i>Please detail any dependencies that would be outside the scope of the change, this could be reliance on another delivery, reliance on some other event that the projects has not got direct control of.</i></p>
