

Section C: DSG Discussion

C1: Delivery Sub-Group (DSG) Recommendations

DSG Date:	22/02/2021		
DSG Summary:	<p>SH presented this agenda item. This change has been raised by Cadent Gas and is a regulatory type of change with a high priority score.</p> <p>This change involves Cadent's continued work on its future billing methodology (FBM). Xserve is to undertake a reassessment of the further defined conceptual requirements. The options require further assessment to determine the best approach and measure to unlock potential to decarbonise heat using existing gas networks. Note: Xserve has previously provided XRN4323 (July 2017) that provided an initial high-level cost estimate. It might be beneficial to use this as a basis for XRN5299.</p> <p>DW asked when there will be feedback presented back to DSC on the FBM. PO stated that this is being assessed at the current moment therefore it should be throughout the process.</p>
