## A3: Proposer Requirements / Final (redlined) Change

Problem Statement:	SGN are looking to expand the detail provided within the current monthly Large Load Site Reports. These additional data items will support the DN RRP Submissions to Ofgem and provide further information to support long term Network modelling.
--------------------	--

<p>Change Description:</p>	<p>Some of the sites within this data have multiple meters but the data is currently provided as an aggregated demand. The result of this is before we can use it we have to investigate each site to better understand the actual demand split or make an 'informed decision' on what the demand is for the individual MPRN's and this can add weeks to the process as well as add risk as we may make an error.</p> <p>SGN are looking at the existing Large Load Reporting, and it has been identified within the current reports that some sites have multiple meters however the report is provided is an aggregated demand.</p> <p><u>Site List</u>  Site_ID  Site_Name  Meter Point Reference Number  LDZ_Name  Street_Name  Town  County</p> <p>Firm_Int_Data  Site_ID  Site_Name  Meter Point Reference Number  LDZ_Name  Year  Month  Type  Energy</p> <p><u>All Data</u>  Site_ID  Site_Name  Meter Point Reference Number  LDZ_Name  Year  Month  Firm  Int  Total</p> <p>The result of this aggregation is that before we can utilise the report we have to investigate each site to better understand the actual demand split or make an 'informed decision' on what the demand is for the individual MPRN's and this can add weeks to the process as well as add risk as an error in our assessment could be made.</p> <p>SGN require the addition of the MPRN within the reports as separate sites relative to their MPRN.</p> <p>Xoserve have provided an interim report for SGN over the last 6 months and we would like to extend this to a permanent change however this would need to be delivered for all DN's collectively.</p>
