

Unregistered AQ (Annual Quantity) Correction

Version 2.0

“Whilst every effort is made to ensure the technical accuracy of the information contained within this presentation, Xoserve can accept no responsibility for any claims (however they arise) made against the company as a result of using the information contained within this presentation”

Background

- A manual process is available for a Shipper to change the current Formula Year and Rolling AQ for a site pre-registration for both brownfield and greenfield sites.
- The following AQ changes are permitted:
 - LSP (>73,200 kWh) to SSP (<73,200 kWh)
 - LSP (>73,200 kWh) to LSP (>73,200 kWh)
 - SSP (<73,200 kWh) to LSP (>73,200 kWh)
 - **SSP (<73,200 kWh) to SSP (<73,200 kWh) changes are exempt**
- If accepted, the change in AQ will derive a new Formula Year and Rolling SOQ and if required allocate a new EUC (End User Category).
- Any outstanding offer from a Nomination based on the current Rolling AQ will be cancelled.

Process

- The attached proforma should be completed and sent to aqq.spa@xoseve.com for consideration.
- The processing of an Unregistered AQ Correction will be within D+5 from the date of receipt.
- If accepted, the requested change in AQ will be applied to UK Link and a response sent to the requester confirming the change has been applied.
- If rejected, a response will be sent to the requester confirming the rejection reason(s).
