A3: Proposer Requirements / Final (redlined) Change

Problem Statement:	The request for this Change Proposal is to ensure that there is visibility to ChMC of the changes within scope of DDP Release 2 2024/25 – this aims to provide transparency so the rationale of the priority being applied to DDP scope can be clearly understood.	
Change Description:	<p>This release will consist of three key items.</p> <p>DNs require access to dashboards in DDP that provide visibility of meter points taking part in hydrogen trials, as well as any changes that take place to data items related to those meter points. Data items such as Calorific Value will also be made available in DDP. Dashboards will also be provided to Shipper and IGTs so they can also track MPRNs that are included in any trials. This release will complete the dashboard development and testing for Shippers and IGTs and deploy the dashboards for all customer groups.</p> <p>A report measure entitled AQ Overdue Meter Reading (also known as AQ at Risk) which shows percentage of AQ that has not had a read for over 3 months has been part of the PARR report suite for some time. At present there is no DDP equivalent or method of retrieving MPRN Level detail for this report. The proposal is that a dashboard and MPRN detail page will be developed for this PARR report.</p> <p>There are three remaining Shipper Pack topics which once added to DDP will allow the Shipper Pack to be decommissioned. It is proposed that one topic (Must Read industry totals) be added to DDP as further progress towards decommissioning the Shipper Pack.</p> <p>The release has been scoped based on consultation with the constituent groups, based on expressed priorities and relevant timescales.</p>	
Proposed Release:	Release 2 2024/25: June - July 2024	
Proposed Consultation Period:	<input type="checkbox"/> 10 Working Days	<input type="checkbox"/> 15 Working Days
	<input type="checkbox"/> 20 Working Days	<input checked="" type="checkbox"/> Other [For information only]

A4: Benefits and Justification

Benefit Description:	The dashboards will enable DNs to manage meter points participating in hydrogen trials and keep up to date with changes to those meter points data items, as well as viewing items such as the
----------------------	--

	<p>Calorific Value. Shippers and IGTs will also be able to track meter points in their portfolios taking part in Hydrogen trials.</p> <p>Shippers will be able to self-serve trends and backing data for the AQ Overdue Meter Reading (AQ at Risk) PARR measure.</p> <p>Further progress will be made towards the goal of decommissioning the Shipper Pack.</p>
	<p><i>What, if any, are the tangible benefits of introducing this change? What, if any, are the intangible benefits of introducing this change?</i></p>
Benefit Realisation:	<p>The Benefits are expected to be realised upon implementation.</p> <p><i>When are the benefits of the change likely to be realised?</i></p>
Benefit Dependencies:	<p>There are no benefit dependencies.</p> <p><i>Please detail any dependencies that would be outside the scope of the change, this could be reliance on another delivery, reliance on some other event that the projects has not got direct control of.</i></p>
