Justification for Customer Class(es) selection:	DNs require data for end users connected to their network via an IGT connection.	

Proposer Requirements / Final (redlined) Change

Problem Statement:	DNs do not have a sufficient level of data, such as PSR and Contact data, for properties connected via an IGT to use in urgent circumstances associated to conducting their license obligations.	
Change Description:	Xoserve need to pass the appropriate data such as contact details and PSR data, from the existing IGT data to the DNs, and update the data with agreed regularity, to ensure both the safety of the end users and that DNs can execute their license obligations effectively.
