

Post Closeout Energy Adjustment - Screen Pack

As previously communicated within DSC Change Pack [3383.2 - VO - PO](#) XRN5564 - *Enhancement of the Energy Balancing Adjustment Process*, a new screen is being introduced to give Gemini Users the ability to add and update post energy closeout adjustments.

Please see the below screen, referred to as “**Post Closeout Energy Adjustment**” that will be available in the following menu path within Gemini ‘Home > Allocations > Post Closeout Adjustments > Post Closeout Energy Adjustment’.

The above screen will be, from implementation, made available to the following User Roles: GEME01 & GEME02 (Read Only)

For more information in relation to the full user functionality being introduced as part of this enhancement, please refer to Change Pack [3383.2 - VO - PO](#).
